7. NEXT STEPS IN MEETING 2020 GOALS FOR NTD CONTROL AND ELIMINATION

ASSOCIATION WITH THE 2012 UN GENERAL ASSEMBLY DECLARATION ON NTD CONTROL

During the course of the six year NTDOP project, many advances were made in global and national approaches to NTD control and elimination. The very first WHO Roadmap for the Elimination of Neglected Tropical Diseases ("WHO Roadmap for NTD Control") was adopted on October 14, 2010, giving evidence that the interventions implemented by its member states were improving the health and quality of life of the populations affected. At the first anniversary of the WHO Roadmap, on October 14, 2011, the WHO, NTDOP, and its member states, along with endemic countries, pharmaceutical companies, donors, and non-governmental organizations, They signed on to a "London Declaration on NTDs" that committed to a new, coordinated push to eliminate the most important NTDs as soon as possible as outlined by the WHO. Global momentum has been building, as the NTDs are less "neglected" and become a understood and a source of global health focus and importance.
